Ayce Systems Limited

Manufacturers & Suppliers of SMART Repair Systems to the Automotive Industry

Ayce Systems is one of the largest and fastest growing companies in the SMART (Small Medium Automotive Repair Techniques) sector operating out of a state-of-the-art purpose built centre in Skipton, North Yorkshire.

There is a growing requirement for SMART repairs which include anything from scuffs and scratches to paintwork, to paintless dent removal, and glass and windscreen repairs. With many repairs taking less than half an hour to complete Ayce Systems has developed a comprehensive product range to tackle all of these repairs along with a training programme that allows customers to carry out this work themselves.

The success of the programme is endorsed by its sole authorised supplier status with leading car manufacturers.

After Sales Training & Support

Backed by a comprehensive hands-on training programme, learning the techniques is straightforward and the investment costs are low.

Ayce Systems provide all the equipment, training and technical support needed to establish and keep your business running.

The First Waterborne SMART Repair

Ayce Systems Ltd in partnership with Akzo Nobel Sikkens

With global commitment to the environment at an all time high Ayce has added the very best waterborne refinish system on the market to its product portfolio.

In extensive comparative tests with competitor products the highly acclaimed Sikkens Autowave Basecoat system came top for colour accuracy, ease of application, covering power, fade out, speed, performance and cost effectiveness.

The addition of Sikkens Autowave Basecoat coatings to Ayce's paint repair system gives customers the option of adding coatings that have a minimum environmental impact into their repair processes without any loss of performance.

Profit from progress, together with Sikkens
