

AYCE SYSTEMS EXHIBITION STAND AT BRITYREX 2010

Ayce Systems, displayed a comprehensive range of wheel refurbishment products including the Wheelrite Pro and the flexible Wheelrite Combi machines on a 33 sq metre stand, as well as having their LWB Mercedes Sprinter demonstration van on another stand alongside.

The Wheelrite Pro incorporates everything needed to repair and re polish kerbed scratched and corroded alloy wheels whilst the dual purpose Wheelrite Combi brings together, for the first time tyre fitting and alloy wheel refurbishment. Other products on show were their Hydraulic Wheel Straightening machine, the Wheelrite Pro Spray Booth and a Dust Extractor unit.

Also featured was Ayce's CureRite UV oven which, in conjunction with their Solaq UV consumable range of UV Primer and UV lacquers, has revolutionised the alloy wheel refurbishment process by allowing a UV primed or UV lacquered alloy wheel to be fully cured in 2 minutes. In conjunction with Guyson International, Ayce also be displayed Guysons new "Wheelmaster" .the perfect shot blasting machine for the effective, timely and safe preparation of alloy wheels prior to refinishing.
